

Call for applications for Project Developers of Indonesia who want to participate in 2017 CTBN program

In Indonesia, development of Clean energy project which contributes to prevent global warming becomes more and more necessary and popular.

Clean Technology Business Network (CTBN) program* provides the support for business matching between Project Developers who are developing / planning clean energy projects in Southeast / South Asia and Japanese Technology Providers who can provide the technologies to match Project Developer's needs.

* This program is implemented as a part of "Establishment of support scheme of CTBN program" commissioned by Japanese Government of Ministry of Economy, Trade and Industry (METI).

【Benefits in participating in our CTBN Program】

- ◆ Access to information on promising Clean Technology Providers of Japan
- ◆ Opportunity to participate in "CTBN business matching forum (event)" and "Online (skype[®]) meeting" which include individual based business meeting with promising Japanese Technology Providers
- ◆ Free advisory service for business matching, project development by expert (hereafter "Project Developer Supporter") (applicants only. Screened by ICETT)

【Requirements for Participation】

1. Targeted Applicants

Project Developers who develop and implement a project which contributes to greenhouse gas emission reduction (clean energy project) in Indonesia.

* Target for Project Developer who is implementing or planning clean projects in Indonesia

* In case the project is/will be implemented in Indonesia, Project Developers from other countries can apply.

2. Targeted Clean Technology

- | | | |
|---------------|------------------------------|--|
| ■ Solar Power | ■ Energy Efficiency | ■ Waste to Energy (W2E) |
| ■ Hydro Power | ■ Geothermal | ■ Clean Transport (Electric Vehicle etc) |
| ■ Wind Power | ■ Biomass / Biogas / Biofuel | ■ Smart Grid |

【CTBN Business Matching Forum at Jakarta】

Participants of CTBN program are basically required to participate in "CTBN business matching forum at Jakarta" which is individual based face-to-face meeting with promising Japanese Technology Providers.
