## **Seminar Objective**

As efforts toward Carbon Neutrality (hereinafter referred to as CN) accelerate on a global scale in response to the rapid progression of climate change, companies' participation in CN efforts has become an urgent and essential issue for survival.

In light of the above background, the objective of this seminar is to let the participating companies understand the necessity and benefits of taking measures toward CN, and to learn how to calculate and understand Greenhouse gas (GHG) emissions throughout their entire supply chain, including their own company, as a first step in such efforts.

Another objective of this seminar for the participating companies is to learn approaches and specific methods for implementing reduction efforts, such as energy conservation, after determining their emissions.

急速に進む気候変動への対応として、世界規模でカーボンニュートラル（以下 CN）に向けた取組みが加速する中、企業の CN に向けた取組への参画は、生き残りをかけた喫緊かつ必須の課題となってきました。

上記背景を踏まえ、本セミナーでは、参加企業が、CN に向けた取組の必要性やメリットについて理解し、取組の第 1 歩となる、自社を含むサプライチェーン全体の温室効果ガス（GHG）排出量の算定・把握方法を習得することを目的とします。また、排出量を把握した後、省エネ等削減取組みへつなげるためのアプローチ方法や具体的手法（技術）についても学ぶことについて目的とします。

**【Day1】 6th August 2025**

**- Policies, Measures and Specific Approaches by Companies to Achieve Carbon Neutrality  
in Thailand's Industries, Calculation Method of GHG Emissions**

*(Target Industry: Food & Food-related Industries)*

産業界のCN達成に向けたタイの政策および施策の最新動向と具体的なアプローチ、GHG排出量算定方法

対象産業：食品及び食品関連産業
